

MOHAMED ELSAYED

Backend Developer Intern · Django Developer · Software Engineer Intern

+20 110 056 3214 | bodymohseen14@gmail.com | Cairo, Egypt | Egyptian | [LinkedIn](#) | [GitHub](#)

SUMMARY

Business Information Systems student building hands-on backend engineering skills in Python, Django, and PostgreSQL through self-directed projects and Django/PostgreSQL coursework from the University of Michigan. Comfortable structuring codebases into modular apps, separating data logic from interface logic, and validating input. Seeking a backend development or software engineering internship to apply these skills on a live codebase.

EDUCATION

Bachelor of Business Information Systems — Helwan University, Cairo, Egypt

2nd Year | Expected Graduation: 2029

TECHNICAL SKILLS

Languages & Frameworks: Python, Django, Object-Oriented Programming (OOP)

Databases: PostgreSQL, SQLite, Database Design

Tools: Git, GitHub, Command-Line Development

Foundations: Software Engineering Principles, Algorithms & Problem Solving, REST-style Web Applications

PROJECTS

Django CRM — Python, Django [View on GitHub](#)

- Built a customer-relationship management web application using Django, organizing functionality into separate apps for the CRM core and public-facing website
- Applied Django's project/app structure and admin framework to manage records, reflecting the University of Michigan Django coursework

Expense Tracker — Python, SQLite [View on GitHub](#)

- Built a command-line application to add, view, and delete personal expenses, with data persisted in a local SQLite database
- Separated database logic from the user-interface layer and added input validation for prices and record IDs

User Management System (OOP) — Python [View on GitHub](#)

- Designed a User class using object-oriented programming to create and manage user records
- Implemented list-based storage with loop-driven logic to view all created users

CERTIFICATIONS

- Web Application Technologies and Django — University of Michigan (Coursera), Aug 2026
- Database Design in PostgreSQL — University of Michigan (Coursera), Jul 2026
- Introduction to Software Engineering — IBM (Coursera), Feb 2026
- Python for Data Science, AI & Development — IBM (Coursera), Apr 2026
- Algorithms and Problem Solving, Level 1 — IT Legend, May 2026
- English for IT: Advice and Time — Cisco Networking Academy, Jun 2026

LANGUAGES

Arabic (Native) • English (Intermediate — technical/IT track)
